WHAT IS CLAIMED IS:

1	1.	A printing method, comprising the steps of:
2		receiving data at a printer;
3		detecting a barcode in the received data;
4		translating the barcode to an external network address;
5		sending on the Internet or other external network an access
6	request for a	document to the external network address;
7		retrieving the document from the external network address;
8	and	
9		printing the document.

- The method as defined in claim 1, wherein the network address is a URL.
- The method as defined in claim 1, wherein said receiving data step
 comprises receiving an e-mail containing said data.
- 4. The method as defined in claim 1, wherein said receiving data step comprises receiving an e-mail with an attachment containing said data.
- 18 5. The method as defined in claim 1, wherein said translating
 19 step
 20 comprises translating the barcode to obtain a PIN#; and
 21 wherein said sending step includes sending the PIN# with
 22 the access request to the external network address for determining if the
 23 request is authorized.

field: and

- The method as defined in claim 1, wherein the detecting a barcode step comprises interpreting a wrapper indicating that a binary sequence is a barcode.
- 7. The method as defined in claim 1, further comprising the steps of:

displaying a menu of print formats for a user to select to print the document; and

receiving a selection of one of said print formats displayed to the user.

- The method as defined in claim 1, further comprising the steps of:
- displaying a field for a transmission address;

receiving a transmission address for another device in said

sending the document to said another device.

- The method as defined in claim 1, wherein the translated barcode includes
- information on printing the document inside another document; and
- further comprising the step of printing the document inside the other document in accordance with the printing information upon receipt of the document at the printer.
- The method as defined in claim 1, further comprising the step of printing the document inside a master document.
- The method as defined in claim 10, wherein the translation step comprises

translating the barcode to obtain at least one identifier that designates the type of contents in said document; and determining a location of the document within the master.

determining a location of the document within the master document based on said identifier.

12. The method as defined in claim 10, wherein the translation step comprises translating the barcode to obtain coordinates designating a portion of the master document; and

determining a location of the document within the master document based on said coordinates.

- 13. The method as defined in claim 10, further comprising the step of determining a location of the document within the master document based on a rule.
- 14. The method as defined in claim 10, wherein the document and the master document are merged to form a single document in a desired format.
- 15. The method as defined in 10, wherein said detecting a barcode step comprises detecting a plurality of barcodes; and further comprising

determining a URL in each of the plurality of barcodes;
sending on the Internet an access request to each of the
URL's:

retrieving a document from each of the URL's;
merging the documents from the URL's with the master
document to obtain a merged document; and
printing the merged document.

16. A printing method, comprising the steps of: receiving data at a printer;

103

77		detecting a barcode in the received data;
78		translating the barcode to a URL;
79		searching for an Internet access device to access the
80	Internet;	
81		sending through the Internet access device an access
82	request for	a document to the URL;
83		retrieving to the Internet device the document from the URL;
84	and	
85		printing the document.
86	17.	The method as defined in claim 16, wherein said receiving
87	data step	
88		comprises receiving an e-mail containing said data.
	4.0	
89	18.	The method as defined in claim 16, wherein said translating
90	step	

19. The method as defined in claim 16, wherein the translated barcode includes

access request to the URL for determining if the request is authorized.

comprises translating the barcode to obtain a PIN#; and

wherein said sending step includes sending the PIN# with the

 $\label{eq:condition} \mbox{information on printing the document inside another} \\ \mbox{document; and}$

further comprising the step of printing the document inside the other document in accordance with the printing information upon receipt of the document at the printer.

- The method as defined in claim 16, further comprising the step of printing the document inside a master document.
 - 21. A system for printing documents, comprising:

104	a first component for receiving data at a printer;	
105	a second component for detecting a barcode in the received	
106	data;	
107	a third component for translating the barcode to an external	
108	network address;	
109	a fourth component for sending on the Internet or other	
110	external network an access request for a document to the external	
111	network address;	
112	a fifth component for retrieving the document from the	
113	external network address; and	
114	a sixth component for printing the document.	
115	22. A program product for printing documents, comprising:	
116	first code for receiving data at a printer;	
	•	
117	second code for detecting a barcode in the received data;	
118	third code for translating the barcode to an external networl	
119	address;	
120	fourth code for sending on the Internet or other external	
121	network an access request for a document to the external network	
122	address;	
123	fifth code for retrieving the document from the external	
124	network address; and	
125	sixth code for printing the document
